New Format	Staff talked about restructuring of the coalition; in part, because the years 6-10 grant submission will be due early 2019, it is important to get the coalition organized with clear groups, and expectations. Important to streamline meetings for leadership to address strategic planning, while work groups do the work of the coalition. Recruitment will be another focus over the summer to engage coalition sectors that have not been at the table regularly.	Discuss various names for leadership group, committees, etc.	The coalition at the next meeting

A picture of our community	Coalition members were engaged to create a map of TPC's service area – members literally picked up markers and created a map of the area with geographic landmarks, hot spots, neighborhoods and various other locations.  The idea behind the task is to get members thinking about their community and its history, highlight areas of concern with an eye toward working on assessment of the problem and strategic planning to tackle problems.	Work on Community Assessment pieces, Logic Model and Strategic Plan.	The Coalition.
